UNITED STATES DISTRICT COURT
NORTHERN DISTRICT OF CALIFORNIA
SAN JOSE DIVISION

CHASOM BROWN, WILLIAM BYATT,
JEREMY DAVIS, CHRISTOPHER
CASTILLO, and MONIQUE TRUJILLO
individually and on behalf of all other
similarly situated,

Plaintiffs,

v.

GOOGLE LLC,
Defendant.

Case No. 5:20-cv-03664-LHK

**JOINT CASE MANAGEMENT
STATEMENT**

Judge: Hon. Lucy H. Koh
Courtroom 8 – 4th Floor
Date: September 29, 2021
Time: 2:00 p.m.

CASE NO. 5:20-cv-03664-LHK

1 Pursuant to Federal Rule of Civil Procedure 16, Civil Local Rules 16-9 and 16-10, the
2 Standing Order for All Judges of the Northern District of California, the Court's Case Management
3 Order of May 20, 2021 (Dkt. 171), and in advance of the Further Case Management Conference set
4 by the Court for Wednesday, September 29, 2021, at 2:00 p.m., Plaintiffs and Defendant Google
5 LLC ("Google") submit this Joint Case Management Statement to report the parties' progress since
6 the previous Joint Case Management Statement was filed on July 21 (Dkt. 224).

7 **Google's Preliminary Statement**

8 Google respectfully seeks the Court's intervention on Plaintiffs' improper inclusion of
9 purported summaries of evidence, detailed descriptions of and quotations from documents produced
10 in discovery, and extended legal arguments in this Joint Case Management Statement ("Joint
11 Statement").

12 The Northern District of California's Standing Order (the "Standing Order") provides that,
13 with respect to discovery, the parties should identify: "Discovery taken to date, if any, the scope of
14 anticipated discovery, any proposed limitations or modifications of the discovery rules, a brief report
15 on whether the parties have considered entering into a stipulated e-discovery order, a proposed
16 discovery plan pursuant to Fed. R. Civ. P. 26(f), and any identified discovery disputes." With
17 respect to class certification, the Standing Order asks for: "a proposal for how and when the class
18 will be certified, and whether all attorneys of record for the parties have reviewed the Procedural
19 Guidance for Class Action Settlements."

20 Plaintiffs' sections in this Joint Statement go far beyond what is contemplated by the
21 Standing Order. Plaintiffs include self-serving summaries of depositions and documents, Plaintiffs'
22 views of what the discovery taken to date proves on the merits, and argument on the putative class
23 is or is not ascertainable. Plaintiffs initially prepared and served on Google a 10-page draft. When
24 Google objected to the draft because it contained improper summaries and arguments, Plaintiffs
25 circulated a 9-page draft instead, leaving most of the offending material. Google felt compelled to
26 respond, but believes this process is contrary to the Standing Order, unproductive, and will quickly
27 get out of hand. Plaintiffs will continue to burden the Court with even lengthier joint case
28 management statements, and will force Google to respond similarly. The Standing Order does not

1 contemplate that the parties litigate the merits of the case through a joint case management
 2 statement, and it is extremely burdensome and an inefficient use of party and judicial resources for
 3 the parties to do so. Google respectfully asks that the Court order the parties to strictly abide by the
 4 Standing Order and limit joint case management statements to a brief update to the Court on the
 5 status of the case.

6 **Plaintiffs' Response**

7 Consistent with prior joint statements (Dkts. 169, 224), Plaintiffs seek to provide a
 8 meaningful update to the Court regarding discovery in this matter. While Plaintiffs believe these
 9 updates are consistent with the Standing Order, Plaintiffs are of course willing to proceed subject to
 10 any guidance the Court provides regarding these joint statements. Google's complaints are
 11 otherwise meritless. Plaintiffs' initial draft did not include anything improper. Plaintiffs revised
 12 that initial draft only to avoid a needless and pointless dispute, with Google threatening to seek
 13 emergency relief from the Court.

14 **I. JURISDICTION AND SERVICE**

15 Google has been served and the Court has jurisdiction over this matter.

16 **II. FACTS**

17 The parties have no new facts to add at this time, although discovery is ongoing.

18 **III. LEGAL ISSUES**

19 The parties have no new legal issues to present at this time.

20 **IV. MOTIONS**

21 **Motions Decided Since the Last Joint CMC Statement**

22 The Court granted various motions to seal (Dkts. 226, 238, 240) and motions for admission
 23 *pro hac vice* (Dkts. 234, 266, 268). The Court granted the parties' joint stipulation to continue
 24 discovery deadlines. Dkt. 261. The parties identified and briefed various discovery disputes before
 25 Magistrate Judge van Keulen, some of which have been resolved. Dkts. 230, 231, 235, 242, 243,
 26 249, 251, 253, 258, 259, 262, 263. Judge van Keulen also issued a scheduling order and revised
 27 scheduling order related to the disputes before Special Master Brush. Dkt. Nos. 269, 273.

28 **Pending Motions**

Two motions to seal remain outstanding, including Dkts. 225, 257.

Anticipated Motions

Plaintiffs' Statement:

Plaintiffs will move for class certification and may also seek summary judgment and/or adjudication on certain claims or issues. Plaintiffs also anticipate filing additional discovery disputes with Magistrate Judge van Keulen.

Google's Statement:

Google anticipates opposing class certification and moving for summary judgment. Google also anticipates briefing additional discovery disputes for Magistrate Judge van Keulen.

V. AMENDMENT OF PLEADINGS

On April 15, 2021, the Court, pursuant to stipulation of the parties, granted Plaintiffs' request for leave to file their Second Amended Complaint. Dkt 138; Dkt 136-1 ("SAC").

VI. EVIDENCE PRESERVATION

Plaintiffs' Statement:

Plaintiffs remain concerned that Google is not preserving records of Google's collection and use of private browsing data, in violation of its "duty to preserve evidence that is relevant or could reasonably lead to the discovery of admissible evidence." *Bright Sols. for Dyslexia, Inc. v. Doe I*, No. 15-CV-01618-JSC, 2015 WL 5159125, at *2 (N.D. Cal. Sept. 2, 2015). Plaintiffs have asked Google whether it is preserving this data and Google has not provided a meaningful response. Plaintiffs are seeking to negotiate a preservation plan with Google and will raise these issues with Magistrate Judge van Keulen.

Google's Statement:

Google has fulfilled its preservation obligations, including by preserving and producing records associated with cookie values that Plaintiffs provided and asserted were set during their private browsing sessions. Magistrate Judge van Keulen ordered "Google need not suspend its standard retention periods applicable to data logs that reflect event-level data of Chrome users in the United States." (*Calhoun*, Dkt. 174.) Nonetheless, Google is prepared to continue the ongoing discussions with Plaintiffs.

1 **VII. DISCLOSURES**

2 The parties exchanged initial disclosures on September 8, 2020. Plaintiffs served amended
3 disclosures on March 16, 2021.

4 **VIII. DISCOVERY**

5 A. Case Schedule

6 On August 24, 2021, the parties submitted a stipulation and proposed order continuing all
7 case deadlines (Dkt. 256), which the Court granted on August 26 (Dkt. 261).

8 B. Written Discovery Since the Last Joint CMC Statement

9 Plaintiffs served their Fifth Set of Requests for Production on August 6, and Google served
10 responses and objections on September 7. Plaintiffs served their Sixth and Seventh Sets of Requests
11 for Production on August 27 and September 10, and Google's responses are due on October 1 and
12 October 10. Plaintiffs served their Sixth Set of Interrogatories on August 27, and Google's
13 responses are due on September 27. Google served its response to Plaintiffs' Interrogatory No. 5
14 and its objections and responses to Plaintiffs' Fifth Set of Interrogatories on August 30.

15 On July 30, Plaintiffs served objections and responses to Google's Third Set of Requests for
16 Admission, Fourth Set of Interrogatories, and Second Set of Requests for Production. Google
17 served its Fourth Set of Requests for Admission on July 22, and Plaintiffs served objections and
18 responses on August 23. Google served its Fifth Set of Interrogatories on August 13, and Plaintiffs'
19 responses are due on September 20, 2021. Google served its Fifth Set of Requests for Admissions
20 on September 7, and Plaintiffs' responses are due on October 7.

21 C. Depositions

22 ***Plaintiffs' Statement:***

23 On August 19, 2021, Plaintiffs deposed the Google employee described by Google's counsel
24 as the "father" of Incognito mode, Brian Rakowski. Mr. Rakowski testified that although Google
25 references "private browsing" in its Privacy Policy and states in its Incognito Splash Screen that you
26 can browse "privately," he would not describe Incognito as "private browsing" (Tr. 83:16-84:3) and
27 admitted that the word "private" carries a connotation that "may not match" what happens with
28

1 Google's Incognito mode (Tr. 97:21-98:17). Plaintiffs will upon request provide the Court with the
2 full deposition transcript or a summary of that deposition.

3 ***Google's Statement:***

4 As explained above, the Joint Case Management Statement is not an appropriate vehicle for
5 Plaintiffs to summarize and interpret deposition testimony, or to argue the meaning of evidence. In
6 any event, Plaintiffs mischaracterize Mr. Rakowski's testimony. In response to the question about
7 how he would describe Incognito Mode, Mr. Rakowski testified that he would describe an Incognito
8 window as a "new browser, a new computer." (Tr. 84:4-8.) Mr. Rakowski later clarified that when
9 he testified that the words "private," "anonymous," and "invisible" were ambiguous, he was
10 referring to the fact that the terms, when used in isolation, such as in the name of a feature, "might
11 be misconstrued" (Tr. 318:5-22). He explained that, with context, the terms "can be super helpful"
12 in explaining how Incognito works. (Tr. 318:23-25-319:1-6.)

13 **D. Protective Order**

14 The parties were able to agree on all terms of a protective order, which Magistrate Judge
15 Susan van Keulen approved on October 15, 2020 with one revision to the provision related to the
16 right to further relief. Dkt. 81.

17 **E. ESI Protocol**

18 The parties stipulated to an order related to ESI discovery, which Judge van Keulen approved
19 on October 15, 2020. Dkt. 80.

20 **F. Discovery Updates**

21 **1. Documents**

22 ***Plaintiffs' Statement:***

23 Plaintiffs have serious concerns regarding the adequacy and timing of Google's productions.
24 Plaintiffs are currently awaiting Google's further production of custodial documents through the
25 Court-ordered October 6, 2021 completion deadline, including from custodians who wrote that
26 "*Incognito has always been a misleading name*" (GOOG-BRWN-00475063 at -65 (emphasis
27 added)) and that Incognito requires "really fuzzy, hedging language" because Incognito is "*not truly*
28 *private*" (GOOG-BRWN-00406065 at -67 (emphasis added)). Google did not identify these key

1 Google employees even as potential custodians, and Google then opposed production of their
2 documents. Plaintiffs have still not received a complete production of documents for the vast
3 majority of the 42 Google custodians. Plaintiffs worry that Google's future productions will reveal
4 still other Google employees who should have been included as document custodians.

5 Plaintiffs also have concerns regarding Google's compliance with Magistrate Judge van
6 Keulen's order requiring production for the first 17 Google custodians by June 18. Dkt. 147-1. For
7 those 17 custodians, Google produced about 43,000 documents by June 18. On September 1, over
8 two months after that deadline, Google produced about 70,000 documents from the files of those 17
9 custodians. That September 1 production included highly relevant documents that Google very
10 clearly should have produced by June 18 but for some reason did not previously produce, including
11 for example an email in which a Google executive wrote:

12 [I]nstead of the expected result of "Going to incognito mode stops Google logging
13 in all products," we would have "Users have a way to set up Incognito to tell Google
to stop logging for all products." This is not what Sundar promised.

14 Hence I see the solution mostly as a remedy for Google to tell regulators that we gave
15 the option to the users, but they didn't see it, and not a feature for the users.

16 GOOG-CABR-00503271 at -74. The newly produced custodial documents also include admissions
17 regarding how "[u]ser expectation of the protections afforded by Incognito are significantly different
18 from the reality" with users expecting (incorrectly) "that Google properties respect their privacy"
19 (GOOG-CABR-00412665 at -75), efforts to "expand Incognito mode to also offer some privacy
20 towards Google" (GOOG-CABR-00413286 at -86), and concerns regarding adding "cookie
21 consent" in Incognito because that would "reveal Incognito's shortcomings" (GOOG-CABR-
22 00395420 at -22). The four documents cited above should have been produced in this case before
23 June 18, particularly since they each include "Incognito," which is a search term. The parties are
24 meeting and conferring on these issues, including to identify which of the about 70,000 documents
25 produced on September 1 for these custodians were not previously produced but hit on the agreed-
26 to and Court-ordered search terms, to determine what happened and why Google did not produce
27 these documents by June 18. The parties will promptly raise any issues with Magistrate Judge van
28 Keulen.

1 Plaintiffs also await production of additional non-custodial documents, which have been
 2 equally illuminating, such as a document with Google employees admitting that Google “*must enter*
 3 *a contract with the user regarding what happens when they enter Incognito Mode*” (GOOG-BRWN-
 4 00027632 at -34 (emphasis added)).

5 ***Google’s Statement:***

6 Google has produced more than 575,000 documents in this case, spanning more than *four*
 7 *million* pages. As explained above, Plaintiffs improperly use the Joint Case Management Statement
 8 to summarize and interpret a handful of these documents, or argue the meaning of evidence. In any
 9 event, although Plaintiffs’ section mis-states and misinterprets the evidence, Google will not
 10 respond tit-for-tat to Plaintiffs’ gratuitous mis-interpretation of evidence, because it is not proper
 11 for a joint CMS. Nor has it any bearing on whether Google has satisfied its production obligations
 12 or whether Plaintiffs are entitled to documents from additional custodians. In fact, Plaintiffs already
 13 presented their arguments for more than 42 custodians in this case, and Magistrate Judge Van
 14 Keulen rejected those, ruling that Plaintiffs were entitled to documents from no more than 42
 15 custodians.

16 Plaintiffs’ vague complaints about the adequacy of Google’s production is not borne out by
 17 the facts. Google fully complied with Magistrate Judge van Keulen’s Order to search (using specific
 18 search terms), review, and substantially complete the production from the first 17 custodians by no
 19 later than June 18, 2021. Dkt. 147-1 at 3. Almost two months after the June 18 substantial
 20 completion deadline, Magistrate Judge van Keulen entered an order that Google cross-produce
 21 certain documents in both the *Brown* and *Calhoun* matters. Dkt. 243. Pursuant to that order, Google
 22 re-produced in both cases, with new cross-production Bates numbers, all non-custodial documents
 23 and custodial documents (of overlapping custodians) previously produced in either just *Calhoun* or
 24 *Brown*. The September 1 production of which Plaintiffs complain was one of Google’s first cross
 25 productions. Therefore, approximately 56,000 documents of the 70,000 which Plaintiffs claim came
 26 from the 17 relevant custodians and were produced on September 1 were custodial documents that
 27 Google had already produced to Plaintiffs. Plaintiffs are well aware of this fact, as Google’s cross-
 28 production contained a cross reference showing which documents had already been produced with

1 Bates numbers from the Brown matter. As for the rest, they are documents that had been produced
 2 in *Calhoun*, but not produced in this case. It is expected that not all of the documents that were
 3 produced in *Calhoun* would be produced in this matter, as the cases involve different issues, the
 4 Plaintiffs in both cases propounded different Requests for the Production of Documents, and the
 5 parties agreed on different search terms. Indeed, if Plaintiffs believed that all documents being
 6 produced in one case would also be produced in the other, they would not have sought an order for
 7 the cross-production of documents. Plaintiffs first raised this issue on the afternoon of September
 8 17, and did not specify how many or which documents it claims should have been produced by June
 9 18, but were not. In any case, Google has not withheld documents from the Plaintiffs; Plaintiffs
 10 have now even more documents than are relevant and responsive as a result of the cross-use
 11 order. That four documents that mention “Incognito” may have been initially missed (but have now
 12 been produced) is hardly sufficient ground to impugn Google’s herculean efforts to produce almost
 13 four million pages in this litigation. Plaintiffs do not, and cannot, claim any prejudice. Nor have
 14 Plaintiffs presented any facts that suggest that Google did not substantially complete its production
 15 of the documents of 17 custodians as ordered by Magistrate Judge van Keulen.

16 **2. Depositions**

17 ***Plaintiffs’ Statement:***

18 Google has over 100,000 employees, and Plaintiffs are at this point limited to 42 document
 19 custodians and 20 depositions. Plaintiffs anticipate that it will be difficult to fully address the many
 20 issues in this case with only 20 depositions, but they are of course working to do that consistent with
 21 Magistrate Judge van Keulen’s rulings. Plaintiffs anticipate seeking to depose, among others,
 22 Google CEO Sundar Pichai and Google CMO Lorraine Twohill. Mr. Pichai and Ms. Twohill are
 23 both document custodians, and they were involved with key decisions and communications relating
 24 to Google’s collection and use of private browsing information. For example, Mr. Pichai was
 25 informed in 2019 as part of a project driven by Ms. Twohill that Incognito should not be referred to
 26 as “private” because that ran “the risk of exacerbating *known misconceptions* about protections
 27 Incognito mode provides.” GOOG-BRWN-00048967.C at -68.C (emphasis added). As part of
 28 those discussions, Mr. Pichai decided that he “*didn’t want to put incognito under the spotlight*”

1 (GOOG-BRWN-00388293 at -93), and Google continued without addressing those known issues.
2 Plaintiffs anticipate additional document productions for Mr. Pichai and Ms. Twohill in the coming
3 weeks. Plaintiffs have also been asking Google for information about foreign custodians whose
4 depositions may require additional steps to schedule and conduct. On August 17, Plaintiffs asked
5 Google to identify which of the current 42 custodians may require such steps. They parties have
6 met and conferred, but Google has not yet provided that information. Plaintiffs will raise any issues
7 regarding the scheduling and number of Google depositions with Magistrate Judge van Keulen.

8 ***Google's Statement:***

9 Google learned for the first time of Plaintiffs' desire to depose Mr. Pichai and Ms. Twohill
10 from Plaintiffs' draft portion in this Statement. Neither of these two depositions is appropriate, and
11 Google will address Plaintiffs' claims in the context of a proper discovery dispute. Plaintiffs'
12 continued attempts to use the joint CMS to argue about evidence (instead of updating the Court)
13 improperly burdens the Court and is disruptive of the discovery process.

14 In any event, Plaintiffs continue to overreach by singling out two senior-level Google
15 executives as "anticipated" deposition targets and mischaracterizing two documents plucked from
16 hundreds of thousands of pages of discovery. Plaintiffs' mis-characterization of these documents is
17 particularly important because "[o]n the proverbial sliding scale, the closer that a proposed witness
18 is to the apex of some particular peak in the corporate mountain range, and the less directly relevant
19 that person is to the evidence proffered in support of his deposition, the more appropriate the
20 protections of the apex doctrine become." *Apple Inc. v. Samsung Elecs. Co., Ltd*, 282 F.R.D. 259,
21 263 (N.D. Cal. 2012). Moreover, Mr. Pichai's status as a Court-ordered document custodian, and
22 Ms. Twohill's status as a custodian (whom Google agreed to add in the spirit of compromise,
23 including to reduce the number of Plaintiffs' disputes that are already before Magistrate Judge van
24 Keulen), in no way reflects their propriety or suitability as deponents. Google will seek relief from
25 Magistrate Judge van Keulen if Plaintiffs continue to pursue apex depositions that are inappropriate,
26 seek irrelevant information, are not proportional to the needs of this case, or can be achieved through
27 less intrusive and less burdensome methods.

3. Class Certification

Plaintiffs' Statement:

Plaintiffs continue to seek documents and testimony relevant to class certification. Google claims there is no way to identify class members, but Google's documents indicate that there are many ways to identify class members using Google data. *See, e.g.*, GOOG-BRWN-00167899 at -99 (Google [REDACTED] data - [REDACTED]); GOOG-CABR-00799195 at -95 (asking if "[REDACTED]"); GOOG-BRWN-00168623 at -36 (Google GWS data - "[REDACTED]"); GOOG-BRWN-00204684 at -84 (Google X-Client-Data header - identification of users in Incognito mode based on "[REDACTED]"); GOOG-BRWN-00229314 at -14 (describing Google's identification of users in [REDACTED] browsing). The "father" of Incognito mode, Brian Rakowski, also testified that Google collects personal information from Incognito browsing, including, for example (and as alleged) "referrer-header" information, IP addresses, and other information that Mr. Rakowski admitted could be used for fingerprinting (Tr. 47:18-51:13). Despite what Google's own internal documents and employees say, Google has blocked discovery into how users and their devices may be identified, meaning there are likely other ways to identify class members. Plaintiffs are continuing to address these issues with Magistrate Judge van Keulen and the Special Master.

Google's Statement:

Google has not blocked discovery into these issues. On the contrary, Google has continuously cooperated with Plaintiffs and has provided documents and testimony on their ever-shifting theories of whether and/or how users and their devices may be identified. Google is not alone in attempting to explain to Plaintiffs that private browsing users cannot be identified. Plaintiffs' definition of the putative class includes individuals who have privately browsed on browsers other than Chrome. Plaintiffs subpoenaed Apple, Mozilla, and Microsoft, seeking identification of those putative class members who browsed using the private browsing mode on

1 Safari, Firefox, and Internet Explorer/Edge respectively. Each of those companies consistently
 2 stated that they do not possess documents or information sufficient to ascertain the identity of
 3 individuals who have used the private browsing mode on their browsers.

4 The parties submitted briefing on this issue, in which Google cited Rule 30(b)(6) deposition
 5 testimony explaining why the absence of the x-client-data header could not be used to identify
 6 individual users in Incognito mode. Google further pointed to documents indicating x-client-data
 7 headers were present in logs in Incognito mode and absent in non-Incognito mode. (Dkt. 218 at 7-
 8 8.) Magistrate Judge van Keulen referred this dispute to the Special Master (Dkt. 221). With regard
 9 to [REDACTED], Plaintiffs confuse aggregate data Google maintains to estimate the total percentage of
 10 Incognito mode usage with a means to identify individual Incognito-mode users. To demonstrate
 11 that [REDACTED] data can not be used to identify individual users, Google is willing to produce [REDACTED] data
 12 associated with Plaintiffs' browsers but—as it has informed Plaintiffs repeatedly—Google requires
 13 Plaintiffs' [REDACTED] ID from their browsers to produce that data. Once Plaintiffs provide these
 14 identifiers, Google can produce the [REDACTED] data they are seeking. Finally, Plaintiffs misleadingly cite
 15 the Rakowski testimony. Mr. Rakowski did not say that Google uses the data to fingerprint. As has
 16 become clear from multiple documents, testimony, and other evidence, it does not. See, e.g.,
 17 GOOG-BRWN-00028757.R (Monsees Depo), 314:23-315:3, Apr. 9, 2021 (“[REDACTED]
 18 [REDACTED]
 19 [REDACTED]
 20 [REDACTED]”).

21 **4. Injunctive Relief**

22 ***Plaintiffs' Statement:***

23 Through discovery, Plaintiffs are learning that Google not only collects and uses private
 24 browsing information, but that Google also provides no way for Plaintiffs and class members to
 25 review and seek deletion of the private browsing information impermissibly collected. Google is
 26 therefore not only violating its promises as to collection but also Google's many promises in terms
 27 of the ability to control Google's storage and use of information. For example, Google's Privacy
 28 Policy promises that “across our services, you can adjust your privacy settings to control what we

1 collect and how your information is used.” Plaintiffs served discovery focused on these issues,
 2 including with respect to whether and how Google might be able to modify its processes to address
 3 such issues by, for example, stopping Google’s collection of private browsing information,
 4 permitting users to review the private browsing information collected by Google, and deleting the
 5 private browsing information Google previously collected and currently stores. Plaintiffs also asked
 6 questions about these issues during Mr. Rakowski’s deposition, where he testified that he was not
 7 aware of any process by which users can delete the private browsing data that Google has
 8 impermissibly collected. Tr. at 302:10-14. Google’s suggestion below that this submission is the
 9 “first indication” of Plaintiffs seeking such relief is meritless. Plaintiffs will raise any issues
 10 regarding this discovery with Magistrate Judge van Keulen.

11 ***Google’s Statement:***

12 This submission is the first indication that Plaintiffs seek this wrongheaded relief: an
 13 injunction forcing Google to associate data it receives when users are logged out and in private
 14 browsing mode with data it receives when users are logged in to their accounts—so that Google
 15 could then identify private browsing users (something it currently does not do)—contrary to various
 16 Google policies and longstanding rules and expectations by regulators in the U.S. and
 17 abroad. Plaintiffs’ newly-minted injunctive relief request is improper, unwarranted, and should
 18 never be granted because it would (ironically for a privacy lawsuit) undermine the privacy
 19 protections Google affords to all its unauthenticated users on the internet. In fact, if a user has
 20 chosen to log in to their Google Account in private browsing mode and has consented to their site
 21 activity data being associated with their Google Account, then they already can review, delete, and
 22 set retention periods for the data at issue. However, if a user is not logged in to their Google Account
 23 in private browsing mode—*like the putative class in this case*—then the data at issue is not
 24 associated with them. There is no way for them to delete the data simply because the data is not
 25 associated with the user or their Google Account by design. Even if Google could associate such
 26 unauthenticated logged-out private browsing data with verified individual identities it should not be
 27 ordered to do so because such association would lead to much less, not more, privacy on the
 28

internet. Plaintiffs and their attorneys cannot be allowed to prioritize their economic interest in certifying a class over the privacy interests of the class members they purport to represent.

5. Expert Discovery

Plaintiffs' Statement:

Plaintiffs disclosed a new consulting expert to Google on September 13, who will assist Plaintiffs in reviewing the extensive amount of documents Google is expected to produce leading up to its October 6 deadline. Google's deadline to assert any objections to this expert is September 27. Plaintiffs do not anticipate any objection, particularly because this expert consulted on a case against Google in the recent past, and because Plaintiffs provided more information than what is required by the Protective Order. The parties are also having ongoing negotiations regarding Google's production of documents relevant to calculating damages. For example, one 2020 Google document states [REDACTED]

[REDACTED] (GOOG-BRWN-00181879 at -79). Google has not yet produced all documents tied to that estimate or the other ways in which Google generates revenues using private browsing information. Plaintiffs' damages experts seek these documents in connection with their analysis and opinions. If necessary, Plaintiffs will raise any issues regarding this discovery with Magistrate Judge van Keulen.

Google's Statement:

Plaintiffs' portion does not raise "any identified discovery disputes" or "scope of anticipated discovery" that is not already underway. Plaintiffs also mischaracterize Google's documents and document production to date and improperly put forth its damages theory under the "Expert Discovery" header in the Joint Case Management Statement, which is inappropriate. Google is reviewing Plaintiffs' disclosures for its proposed consulting expert and will respond in a timely manner in accordance with the Protective Order (Dkt. 81).

6. Special Master

Plaintiffs' Statement:

With the Special Master's assistance, Plaintiffs are making progress with their efforts to understand the full scope of Google's collection and use of private browsing data, which, even after

1 more than a year of discovery, still remains unknown. Upon the Special Master’s recommendation,
 2 the Court has ordered Google to identify all data sources that may contain information collected
 3 from private browsing sessions. Dkt. No. 273. And for each data source, Google must also provide
 4 the name, a description of its purpose and function, the default retention status, and the current
 5 retention status, including by identifying when a change to retention status was implemented. *Id.*
 6 This information will inform the production of data by Google, as outlined in the recent order.

7 ***Google’s Statement:***

8 On September 16, Magistrate Judge van Keulen ordered Google to “identify to the Special
 9 Master and Plaintiffs all databases and data logs (collectively, “data sources”) that may contain
 10 responsive information.” (Dkt. 273.) On September 17, Google identified 70 potentially relevant
 11 and responsive data sources, and their retention periods, to the Special Master and Plaintiffs. On
 12 September 22, the parties will meet and confer under the Special Master’s supervision to discuss
 13 these data sources.

14 **7. Privilege**

15 ***Plaintiffs’ Statement:***

16 The parties have been meeting and conferring on many issues relating to Google’s privilege
 17 assertions, with Google withholding or redacting thousands of documents that are responsive to
 18 Plaintiffs’ requests, including many for which no attorney is included in the communication, where
 19 attorneys otherwise appear to be playing a business role, or where it appears that non-lawyers copied
 20 Google in-house counsel only to limit production. For example, the parties have a dispute regarding
 21 a document cited and quoted in the last Case Management Statement, which Google subsequently
 22 clawed back. *See* GOOG-BRWN-00048967.C. That is a “comms” document prepared for Google
 23 CEO Sundar Pichai. Google claims the redacted statements reflect or seek legal advice, but
 24 Plaintiffs contest Google’s characterization and seek re-production of that document without
 25 Google’s improper redactions. This would not be the first time Google employees have included
 26 Google lawyers to try to withhold non-privileged documents. *See In re Google Inc.*, 462 F. App’x
 27 975 (Fed. Cir. 2012) (denying Google’s petition and affirming that Google email including Google
 28 attorney was not privileged or work product).

Google’s attacks on Plaintiffs’ counsel, below, are meritless. Google redacted or withheld thousands of documents, claiming that they seek or reflect legal advice by Google’s in-house attorneys. But when the privilege claim is based on an attorney’s role as in-house counsel, that “warrants heightened scrutiny” because “[i]n-house counsel may act as integral players in a company’s business decisions or activities, as well as its legal matters.” *Oracle Am., Inc. v. Google, Inc.*, 2011 WL 3794892, at *4 (N.D. Cal. Aug. 26, 2011). Plaintiffs requested additional information to assess the extent to which Google in-house attorneys referenced in Google’s privilege log were actually providing legal advice, but Google has so far refused to provide that information. And the documents produced by Google demonstrate that Google’s in-house counsel in fact routinely play a non-legal business role.

As part of the meet and confer process, and consistent with the protective order, Plaintiffs’ counsel cited for Google’s counsel certain non-privileged documents produced by Google that demonstrate certain Google privilege assertions are unwarranted. Those documents are not privileged. Plaintiffs identified numerous documents that were designated privileged by Google employees but that Google’s counsel has not clawed back, acknowledging that they are not privileged. Google clawed back two (of many) documents cited by Plaintiffs. Plaintiffs promptly complied with Google’s requests. Unlike the cases cited by Google below, after the claw back notices, Plaintiffs’ counsel took the proper steps: (1) sequestering the documents; (2) never using the documents in public court filings or depositions; and (3) seeking to resolve the issues with the Court through *in camera* review. *See Bahdjedjian v. W. Diocese of the Armenian Church of N. Am.*, 2020 WL 5353982, at *5 (C.D. Cal. Apr. 29, 2020) (counsel failed “to resolve the issue with defendants” and “rather than seeking relief from the court” they “postured, insulted, and threatened defendants—and then publicly filed the disputed documents”); *ColorTokens, Inc. v. Medovich*, 2018 WL 10419783, at *2 (N.D. Cal. Oct. 22, 2018) (counsel used privileged documents during a deposition and as exhibits in state court litigation rather than availing themselves of the “proper recourse . . . to bring the dispute before the state court”); *U.S. ex rel. Hartpence v. Kinetic Concepts, Inc.*, 2013 WL 2278122, at *2 (C.D. Cal. May 20, 2013) (counsel did not seek “guidance from the court” and instead “repeatedly us[ing] [privileged documents] in the pleadings”); *Rico v. Mitsubishi*

1 *Motors Corp.*, 171 P.3d 1092, 1095-96 (Cal. 2007) (attorneys used defense counsel’s notes during
 2 the deposition of a defense expert); *Clark v. Superior Ct.*, 125 Cal. Rptr. 3d 361, 374 (Cal. App.
 3 2011) (counsel “affirmatively used some of the substantive information contained in the privileged
 4 documents to question witnesses” and “to craft a claim against [the defendant]”).

5 Plaintiffs have at all times acted ethically and in compliance with all applicable rules.
 6 Plaintiffs cited documents to raise with Google their “factual basis sufficient to support a reasonable,
 7 good faith belief that *in camera* inspection may reveal evidence that information in the materials
 8 [redacted or withheld] is not privileged.” *Dolby Lab ’ys Licensing Corp. v. Adobe Inc.*, 402 F. Supp.
 9 3d 855, 864 (N.D. Cal. 2019) (quoting *In re Grand Jury Investigation*, 974 F.2d 1068, 1074 (9th
 10 Cir. 1992)). Google in turn doubled down on its improper privilege assertions, clawing back
 11 documents that are clearly not privileged. Regardless, Plaintiffs sequestered those documents.
 12 Going forward, Plaintiffs will continue to act ethically and in compliance with the protective order.
 13 Finally, Plaintiffs will of course notify Google in the event Plaintiffs identify a privileged
 14 communication that should not have been produced. Google’s suggestion that Plaintiffs “have no
 15 intention” of doing so is meritless. Even assuming that Google’s privilege assertions are proper, it
 16 is unfair for Google to assume the worst of Plaintiffs when Google’s lawyers in the first instance
 17 declined to mark the documents as privileged.

18 Plaintiffs are seeking to promptly resolve these privilege issues with Magistrate Judge van
 19 Keulen, including through *in camera* review, in advance of the upcoming depositions.

20 ***Google’s Statement:***

21 Counsel for Plaintiffs have committed and continue to commit inexcusable ethical violations
 22 by seeking out, reviewing, and attempting to use privileged documents that have been inadvertently
 23 produced by Google. This is particularly concerning given that the pace at which Google must
 24 produce documents in order to comply with Court-ordered production deadlines necessarily means
 25 that some privileged material is produced inadvertently. California and federal law make clear that
 26 attorneys who inadvertently receive materials subject to attorney-client privilege should “[r]efrain
 27 from examining the materials any more than is essential to ascertain if the materials are privileged”
 28 and must “immediately notify the sender that he or she possesses material that appears to be

1 privileged.” *Rico v. Mitsubishi Motors Corp.*, 42 Cal. 4th 807, 817 (2007) (citing *State Fund Comp.*
 2 *Ins. v. WPS, Inc.*, 70 Cal. App. 4th 644 (1999)); *see also U.S. ex rel. Hartpence v. Kinetic Concepts,*
 3 *Inc.*, 2013 WL 2278122, at *2 (C.D. Cal. May 20, 2013) (“The ‘receipt of privileged
 4 communications imposes a duty on counsel to take some reasonable remedial action.’”) (quoting
 5 *Gomez v. Vernon*, 255 F.3d 1118, 1134 (9th Cir. 2001)).

6 Notably, Plaintiffs do not dispute that they have failed to notify Google of the inadvertent
 7 production of privileged communications. Indeed, Plaintiffs have yet to notify Google of the
 8 inadvertent production of even a single privileged document.¹ However, Plaintiffs have not only
 9 failed to notify Google of such inadvertent productions, but have also searched for, reviewed, and
 10 attempted to use Google’s privileged communications to gain a strategic advantage in this case. As
 11 one example, upon receiving a document from Google that contained redactions of email
 12 communications between Google in-house counsel and Google employees bearing “Redacted -
 13 Privilege” labels, Plaintiffs’ counsel actively searched for other versions of the same email thread
 14 to determine whether privileged material was redacted in each produced version. When Plaintiffs’
 15 counsel found that Google inadvertently failed to redact the same privileged communications in a
 16 second version of the document, Plaintiffs did not notify Google of the inadvertent
 17 production. Instead, Plaintiffs used the privileged information by (i) taking screenshots of material
 18 that they knew Google considered privileged; (ii) causing the privileged material to be further
 19 disseminated and reviewed by even more members of Plaintiffs’ legal team by inserting those
 20 screenshots in correspondence to Google (along with the
 21 “GOOGLETEAM@lists.susmangodfrey.com” email list that Plaintiffs have identified as their
 22

23
 24 ¹ For example, Google inadvertently produced a document with an unredacted section titled
 25 “Feedback from legal” that reflects the legal advice of counsel regarding proposed descriptions of
 26 the operation of Chrome’s Incognito mode on June 18, 2021. Plaintiffs never made any attempt to
 27 notify Google of the inadvertent production of this document. Instead, they proceeded to cite the
 28 document in the July 21, 2021 Case Management Statement filed with the Court. *See* Dkt. 224 at 7
 (citing GOOG-BRWN-00153850). During subsequent meet and confers and in correspondence,
 Plaintiffs have refused to acknowledge that they have any obligation to inform Google of the
 inadvertent production of privileged materials whatsoever, and their conduct in this case indicates
 that they have no intention to provide any such notification in the future.

1 “service email” in this case, which is also the service email that Plaintiffs use for other, unrelated
 2 cases against Google); and (iii) citing the screenshots and unredacted communications in support of
 3 their (incorrect) claim that the material constitutes “business advice” that is not privileged.²

4 The law is clear: once counsel examines a document that has been transmitted between an
 5 attorney and client, “that examination would suffice to ascertain the materials are privileged, and
 6 any further examination would exceed permissible limits.” *Clark v. Superior Ct.*, 196 Cal. App. 4th
 7 37, 53-55 (2011) (holding that counsel’s subsequent review of inadvertently produced documents
 8 to determine if the dominant purpose of the documents was business or legal advice “necessarily
 9 involved an assessment of its contents,” supporting the trial court’s conclusion that counsel breached
 10 his ethical obligations). As Judge Seeborg held in *ColorTokens, Inc. v. Medovich*, 2018 WL
 11 10419783, at *3 (N.D. Cal. Oct. 22, 2018):

12 Under *State Fund*, Medovich’s counsel had a duty to stop reviewing the documents as soon
 13 as it was clear they contained communications between a client and the client’s attorney. To
 14 the extent Medovich wished to contest the designation of these documents as privileged, the
 15 proper recourse was to bring the dispute before the state court. Accordingly, Medovich’s
 16 counsel failed to perform their ethical duties under *State Fund* with respect to both the patent
 17 emails and the Pillsbury firm emails.

18 Moreover, in the instances where Google redacted privileged communications in certain documents
 19 and inadvertently produced unredacted versions of documents containing the same privileged
 20 communications, it should be clear to Plaintiffs that the production was inadvertent, thereby
 21 triggering Plaintiffs’ obligation to notify Google. See *Bahdjedjian v. W. Diocese of the Armenian*

22
 23 ² In an attempt to whitewash their egregious breach of ethical rules, Plaintiffs cite *Dolby Lab’s*
 24 *Licensing Corp. v. Adobe Inc.*, 402 F. Supp. 3d 855, 864 (N.D. Cal. 2019) for the proposition that
 25 they are allowed to insert screenshots of inadvertently produced unredacted documents in
 26 correspondence to Google to raise their “good faith belief” that the redacted communications are
 27 not privileged. That is incorrect. In *Dolby*, the Plaintiffs identified redacted documents and raised
 28 a challenge to the redactions based on the unredacted contents of the documents and the descriptions
 provided in the producing party’s privilege log. They did not—as Plaintiffs have done here—create
 images of an unredacted version of the document at issue and insert those images in correspondence
 challenging the basis for the redactions. The former course of action is permissible; as discussed
infra, the latter is an obvious violation of well-settled ethics rules.

1 *Church of N. Am.*, 2020 WL 5353982, at *3 (C.D. Cal. Apr. 29, 2020) (“Defendants’ production
 2 contained visible redactions—‘prominent notations of confidentiality’—that clearly conveyed their
 3 assertion of privilege . . . Once those redactions were removed, Plaintiff’s counsel had no reason to
 4 review the underlying material to ‘ascertain’ if it was privileged; the redactions made perfectly clear
 5 that Defendants believed it was.”). Plaintiffs’ counsel’s “continued review, use, and disclosure of
 6 [Google’s] potentially privileged/confidential material [i]s unquestionably an ethical violation.” *Id.*
 7 at *4.

8 Plaintiffs claim that their conduct is entirely proper because, after receiving clawback
 9 notifications from Google, they have informed Google that they will comply with their obligations
 10 under the Protective Order. But that is not the law. Plaintiffs have a duty to inform Google of the
 11 inadvertent production of privileged materials as soon as they come across any such documents—
 12 particularly here, where Court-ordered deadlines have forced a pace of production that inevitably
 13 results in inadvertent production of privileged documents. Plaintiffs have failed to do so. Google
 14 intends to raise this troubling behavior with Magistrate Judge van Keulen and seek appropriate
 15 relief.

16 **8. Google Product Changes**

17 ***Plaintiffs’ Statement:***

18 On August 18, 2021, public reports surfaced about Google’s plan to rewrite the Incognito
 19 Splash Screen disclosures considered by Your Honor in connection with both of Google’s motions
 20 to dismiss, including the pending motion to dismiss Plaintiffs’ breach of contract claim. Yet the
 21 proposed revised Splash Screen continues to exclude Google from the list of entities that an
 22 Incognito user may be visible to. Google is aware of this problem, but seemingly refuses to fix it.
 23 In an internal document, one Google employee complained that the Incognito Splash Screen fails to
 24 explain “Who am I currently protected from?” and suggested that it be rewritten to clarify that “You
 25 are protected from other people who use this device” but “*You are not protected from Google.*”
 26 GOOG-BRWN-00048773 at -73 (emphasis added). The document includes a drawing, with a
 27 checkmark next to stick figures (i.e., “other people who use this device”) but a big “X” next to
 28 Google’s logo. *Id.* Further, as discussed in the Second Amended Complaint, after this lawsuit was

1 filed, Google began testing a “Consent Mode (Beta)” for Google Analytics, where websites for the
 2 first time would be required to indicate to Google whether the users agreed to be tracked by Google
 3 Analytics and Ad Manager. SAC ¶ 140, Dkt. 136-1. Plaintiffs seek documents and additional
 4 information regarding these changes and will raise any issues with Magistrate Judge van Keulen.

5 ***Google’s Statement:***

6 This is another improper attempt by Plaintiffs to litigate the merits of their case in the Joint
 7 Case Management Statement. Indeed, Plaintiffs do not identify any discovery disputes in their
 8 portion above. Plaintiffs have not previously raised GOOG-BRWN-00048773 for Google’s
 9 attention and cite it out of context, as it is a ***proposed*** communication mechanism with hand
 10 drawings for the Incognito brand across different Google products, including those not at issue in
 11 this lawsuit. Further, Plaintiffs’ portion simply serves to summarize what they have found so far,
 12 which is far from describing any “anticipated discovery” as contemplated in the Standing Order for
 13 All Judges of the Northern District of California.

14 **9. Plaintiffs’ Deficient Response to Google’s Interrogatory No. 12**

15 ***Google’s Statement:***

16 Google’s Interrogatory No. 12 requests Plaintiffs describe with particularity whether they
 17 “agreed to all terms in the documents [they] allege are part of the contract between [Plaintiffs] and
 18 Google,” citing the following documents referenced at Paragraph 268 of Plaintiffs’ Second
 19 Amended Complaint: Google’s Terms of Service, Chrome Terms of Service, Google’s Privacy
 20 Policy, Chrome Privacy Notice, and the Chrome Incognito Notice. Plaintiffs respond by vaguely
 21 alleging that “the Chrome Privacy Notice promises Plaintiff and Class members that Google does
 22 not collect or use private browsing communications,” and that “Google’s Privacy Policy, the
 23 Incognito Screen and the ‘Search & Browse Privately’ page” make similar promises. This is an
 24 evasive response that does not attempt to answer the Interrogatory; namely, Plaintiffs do not indicate
 25 whether they ***agreed*** to a single term in the documents they allege are part of their contract with
 26 Google. Alleging a few self-serving “promises” in the identified documents does not respond to the
 27 substance of the Interrogatory, and Plaintiffs should amend their response to do so. According to
 28 Plaintiffs, these documents are central to the case; indeed, the documents were selected precisely

1 because they had been identified as the basis for Plaintiffs’ contract with Google in Plaintiffs’
 2 Second Amended Complaint. Plaintiffs cannot now raise “burden” to shield information germane
 3 to what they assert is the basis of their claim.

4 ***Plaintiffs’ Statement:***

5 Plaintiffs fairly responded to this request and in good faith met and conferred with Google
 6 regarding the burdensome nature of Google demanding that Plaintiffs identify each and every
 7 representation agreed to among the thousands of pages of documents that Google produced.
 8 Plaintiffs offered to review particular statements or representations that Google identified for this
 9 discovery request, but Google declined. In their operative complaint, Plaintiffs allege that
 10 “Google’s relationship with its users is governed by the Google Terms of Service, the Google
 11 Chrome and Chrome OS Additional Terms of Service, and the Chrome Privacy Notice, which
 12 incorporate and/or should be construed consistent with the Privacy Policy, the ‘Search & Browse
 13 Privately’ page, and the Incognito Screen.” Dkt. 136-1. Plaintiffs fairly responded to the
 14 interrogatory by identifying terms from those documents to which they agreed and which are
 15 relevant for purposes of their breach of contract claim. Google’s demand that Plaintiffs review
 16 thousands of pages and state whether each and every term constitutes an enforceable commitment
 17 to which Plaintiffs agreed, notwithstanding relevance to this case, creates an undue burden. The
 18 parties are raising this issue with Magistrate Judge van Keulen.

19 **10. Plaintiffs’ Blanket Refusal to Answer Google’s RFA Nos. 30, 32, and 34**

20 ***Google’s Statement:***

21 Google’s requests seek admissions regarding Plaintiffs’ understanding of Google’s
 22 collection of the data described in their Complaint through popular Chrome modes, *see, e.g.*, RFA
 23 No. 30 (understanding of collection through Chrome’s Basic Mode), and whether Plaintiffs
 24 interpreted Google’s Chrome Privacy Notice to convey whether Google would collect that data from
 25 users in those modes. *See, e.g.*, RFA No. 32 (Basic Mode); RFA No. 34 (Using Chrome without
 26 Sync enabled). Plaintiffs’ interpretation of the Chrome Privacy Notice—a document they allege
 27 governed their relationship with Google, and which they claim Google breached—and the various
 28 mode descriptions therein (including the data, if any, Google receives in various modes), is plainly

1 relevant in this action. Plaintiffs' suggestion that some of this discovery could also be relevant in
2 the *Calhoun* case is not reason to characterize it as absent class member discovery for *Calhoun* and
3 deny Google relevant discovery in this litigation. Plaintiffs should not be surprised that relevant
4 information might overlap between the two cases--not only has the Court ordered the two related
5 and required that copies of discovery responses served in one of the matters be provided in the
6 related matter, *see* Dkt. 243 at 4, but *Calhoun* is focused on users browsing in an unsynced state (of
7 which Incognito Mode is one). Further, Plaintiffs' interpretation of the Chrome Privacy Notice,
8 which is sought by the requests, is at issue in both cases. Google sent Plaintiffs a letter on September
9 13 regarding their refusal to respond to the requests, and Plaintiffs have indicated a response letter
10 is forthcoming.

11 ***Plaintiffs' Statement:***

12 These RFAs reflect an improper attempt by Google to conduct purported absent class
13 member discovery in the *Calhoun* matter. Google admitted to this in a September 13 letter, alleging
14 that the RFAs are relevant in part because Google contends the named Plaintiffs in *Brown* are class
15 members in *Calhoun* and vice versa. Plaintiffs' operative complaint makes no mention of "sync"
16 and Mr. Rakowski testified that the "basic" or "regular" mode, which would be at issue in *Calhoun*,
17 is different from the Incognito mode at issue in this action. Tr. at 26:25-28:25, 209:19-210:2. Other
18 RFAs served with this discovery request further demonstrate Google's attempt to conduct discovery
19 in *Calhoun* with the *Brown* Plaintiffs. Such discovery is improper, and Plaintiffs should not be
20 required to respond to discovery requests relating to another case to which they are not parties and
21 Google has not even demonstrated how Plaintiffs could be absent class members. That these cases
22 were ordered related for purposes of coordinating discovery against Google, and the Court ordered
23 that Plaintiffs' discovery responses in *Brown* and *Calhoun* be cross-produced, should not be
24 construed as an invitation for Google to conduct discovery of Plaintiffs in a case to which they are
25 not a party. The parties are raising this issue with Magistrate Judge van Keulen.

26 **IX. SETTLEMENT AND ADR**

27 No settlement discussions have taken place. Pursuant to ADR Local Rule 3-5 and Civil
28 Local Rule 16-8, on August 19, 2020, the parties met and conferred regarding the available dispute

1 resolution options and filed their respective ADR Certifications. The parties do not believe that
2 ADR is appropriate at this time.

3 **X. PROPOSED CASE SCHEDULE**

4 On August 26, 2021 the Court granted the parties' stipulation and proposed order extending
5 the case deadlines. Dkt. 261.
